गे मायभू

मराठी

गे मायभू तुझे मी फेडीन पांग सारे
आणीन आरतील हे सूर्य, चंद्र, तारे

आई, तुझ्यापुढे मी आहे अपून तन्हा.
शब्दात सोड माझ्या आता हक्क पान्हा.

आई तुझ्यापुढे ही माझी अथा कशाला ?
जेव्हा तुझ्यामुळे हा जन्मास अर्थ ताला ।

मी पायधुक घेतो जेव्हा तुझी जराशी
माझी ललाटेचा वनते प्रयाग काशी ।

आई तुझी अशी मी गाईन रोप गाणी
माझी तुझ्या दुधाने गेली विपून वाणी ।

Article Title : Global warming

Global warming

Scientists made an alarming discovery in the 1980s. They found out that the average temperature of the earth's surface was slowly rising. This trend is called global warming. Today we know that global warming is increasing because more and more gases get into the atmosphere.

Greenhouse effect

A greenhouse is a glass house in which plants grow. The glass lets light in and at the same time keeps heat from getting out. This heat keeps the plants warm, even when it is cold outside. The same happens to the earth's atmosphere. It lets sunlight in and keeps carbon dioxide and other gases from getting out. We need these gases but too much of them trap more heat.

Causes of Global warming

For a long time people on our earth didn't think a lot about greenhouse gases. The situation changed when people started using more and more energy in the form of fossil fuels like oil, gas and coal. We burn fossil fuels to power factories, run cars

produce electricity and heat houses. As fossil fuels burn they let carbon dioxide into the atmosphere.

During the last few decades people have also cut down many forests. Trees use carbon dioxide when they make their own food. Fewer trees mean that less carbon dioxide is taken out of the atmosphere.

Reducing global warming.

Finding a solution to solve the world's biggest environmental problem is not an easy task although we need energy to make our economy grow there are things that could be done to fight off this problem. Carpools or travelling by public transport could take many cars off the roads. You could turn off lights, TV sets, computers and other electrical items if you don't need them. Companies have been spending a lot of money to produce items that use little energy. We also need to use more alternative energy like sunlight wind power or wave power. Car companies have started to produce a new type of cars known as hybrids. It works like an ~~en~~ electric car

but also has a small petrol engine.

The Kyoto Protocol.

In 1997 over 150 countries signed the Kyoto protocol at the united nations climate conference industrialized countries should reduce their emissions of greenhouse gases. The United states which produces about 25% of all greenhouse gases has often made public that it will not support the agreement.

Article Title : हम सब सुमन एक उपवन के

हम सब सुमन एक उपवन के
एक हमारी धरती सबकी
जिसकी मिट्टी में जन्मे हम
मिली एक ही धूप हमें है
सींचे जाए एक जल से हम ।
पले हुए हैं शूल-शूल कर
पलनों में हम एक पवन के
हम सब सुमन एक उपवन के ॥

रंग रंग के रूप हमारे
अलग-अलग है फयारी-कयारी
लेकिन हम सबसे मिलकर ही
इस उपवन की शोभा सारी
एक हमारा माली हम सब
रहते जीये एक बागन के
हम सब सुमन एक उपवन के ॥

सुरज एक हमारा, जिसकी
किरणों उसकी कली खिलाती,
एक हमारा पौधे-पौधनी
जिसकी हम सबको नहलाती ।
मिले एकसे स्वर हमको हैं,
धूमरों के मीठे गुंजन के
हम सब सुमन एक उपवन के ॥

Article Title :

कॉटा में मिलकर हम सबने
हँस हँसकर है जीना सीखा,
एक सूत्र में बंधकर हमने
हार गले का बनना सीखा।
सबके लिए शुभंघ हमारी
हम संगार धनी निधन के
हम सब सुमन एक उपवन के ॥
